EDUCATION

Sir Visvesvaraya Institute of Technology, Nashik

B.E. - Computer Science and Engineering - CGPA - 8.18

Feb 2021 - Jun 2024

Nashik, Maharashtra

PROJECTS

• Developed an AI-powered platform offering five tools - Image Generation, Video Generation, Code Generation, Music Generation, and Conversational AI. Integrated OpenAI and Replicate AI APIs to enhance prompt efficiency and output quality. Utilized Prisma ORM with PostgreSQL for managing user subscriptions and API limits, ensuring reliable data integrity and faster queries. Implemented secure payment integration with Stripe to enable subscription-based unlimited content generation

VidCore - Video Streaming Platform (Open Source) 🔀 | NodeJs, ExpressJs, MongoDB, Mongoose

• Built and deployed a robust backend system using **Node.js**, **Express.js**, **and MongoDB**, implementing secure user authentication with **JWT access/refresh tokens** and **bcrypt** for password hashing. Designed efficient **Mongoose database models** and optimized performance using **aggregation pipelines**. Integrated middlewares such as **Multer** for file handling, **Cloudinary** for cloud storage, **cookie-parser** for token management, and **CORS** for cross-domain communication. All APIs were thoroughly tested and validated using **Postman**.

EXPERIENCE

Decision Foundry

Associate Software Engineer

Mar 2025 - Present

Bangalore

• At DF, I work on **AI-powered projects**, building intelligent chatbot interfaces and exploring ways to make them smarter and more interactive. I also pitch in on **marketing and business projects**, doing a bit of everything on both the **frontend and backend**. Most of my work happens in the JavaScript world with React, Angular, Node.js, Express, and MongoDB, and I'm always exploring AI to make things smarter and smoother for users.

ExcelR Feb 2024 - Oct 2024

Full Stack Developer Program

Pune

• Worked on a full-stack application with **Java**, enabling role-based access control for employees and admins. Integrated **REST APIs** for handling complex data sets securely. Governed the backend data management with MySQL

Business Web Solutions

Jan 2023 - March 2023

 $Web\ Developer\ Intern$

Delhi

• Utilizing HTML, CSS, JavaScript, and React.js, delivered a number of modules and tasks that ensured responsive design and interactive user experiences.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SQL

Frameworks/Technologies: Next.js, React.js, Node.js, Express.js, MongoDB, MySQL

Tools: Git, GitHub, Visual Studio Code, Postman, AWS (Lambda)

EXTRACURRICULAR / ACHIEVEMENTS

- Received the "Best Newcomer" Award at Decision Foundry for making a significant impact early in the role.
- Achieved a 71.10 percentile in the TCS National Qualifier Test (NQT).
- Led the final-year engineering project to successful completion, managing the team and participating in multiple project competitions.
